

AUTHORIZE.NET PAYMENT GATEWAY

Authorize.Net Payment Gateway Software for your online business

Our Payment Gateway account enables you to accept credit card and electronic check payments from your e-commerce Web site.

Authorize.Net understands the evolving needs of Web merchants -- our solutions are designed to help you grow your online business.

Accept a Variety of Payments – All major credit cards, eCheck (electronic checks from bank accounts), gift cards, signature debits, and Internet auctions.

Manage Your Transactions – Use our full-featured Merchant Interface to monitor and control payments through your Web site.

Prevent Fraud – Identify suspicious transactions with our value-adding products and built-in fraud tools.

Risk Management – Sensitive data is stored in the Authorize.Net PCI-compliant data center, never on your computer.

Receive Payments Quickly – Your funds are automatically deposited into your merchant bank account within days.

Free Help – Authorize.Net provides live technical and account support to merchants, as well as access to online documentation and user guides.

Authorize.Net enables all types of merchants to accept secure and reliable credit card and electronic check payments quickly and easily. We offer flexible application programming interfaces (APIs) with no licensing or developing fees, and have numerous certified third-party options that offer quick and secure integration methods. Choose one of the three processes below to get started.

All payments are
securely processed by

Do It Yourself - Our easy-to-implement Simple Checkout allows customers to purchase single items (in any quantity) using our hosted payment form. Simply enter appropriate item information, and HTML code is created to insert Donate or Buy Now buttons into your Web site.

Merchants and developers with Web expertise and resources who are able to perform their own integration can find time-saving resources such as sample code, documentation, troubleshooting tools, FAQs, and everything else they need to get started in our Integration Center.

Contract a Certified Developer - If you need the expertise and convenience of a Web developer to implement your payment gateway integration, we highly recommend you choose an Authorize.Net Certified Developer. Our Certified Developers must meet rigorous integration standards and provide samples of successful integrations.

Select a Pre-Integrated Solution - Choosing a pre-integrated product is often the easiest and most practical integration method. There are several Authorize.Net solutions that enable you to submit transactions right away, as well as hundreds of certified, third-party solutions. Our Certified Solutions meet the highest security and integration requirements, including our preferred Advanced Integration Method (AIM) Merchant Interface

Manage Your Transactions - Submit, review, or void your transactions online. Manually enter payments or issue refunds with the built-in Virtual Terminal, or submit multiple transactions in a single file using the Batch Upload feature. Generate and download reports on settled, declined, and returned transactions; and import downloaded transaction data into your QuickBooks software.

Configure Your Account - Configure the way transactions are handled, including security settings and transaction responses. You can also sign up for value-adding services and important announcements.

Review Account Activity - Search your transaction history based on date, credit card number, customer name, and other fields. Reconcile payment and billing activity using online reports and statements. You can also view your Authorize.Net billing statement and payment history.

Merchant Service Group, Inc.
With every transaction, every service,
every product, we put your needs first!

Meeting all of your point-of-sale needs!

SETTING THE STANDARD FOR QUALITY
