

# VERIFONE P900 PRINTER

**There's one correct answer to the strictest printing performance demands—the PRINTER 900.**

Positioned at the top of the VeriFone line, the PRINTER 900 is fast, reliable and compatible with VeriFone-developed PRINTER 200 and 250 text applications.

As a premium roll printer that can increase merchant productivity, the PRINTER 900 earns the highest marks.

**Swifter Transactions**

The PRINTER 900 has significantly reduced average transaction time, and there are several reasons why. Its raw print speed is a swift 3.7 lines per second. It has a separate motor for paper advance, plus a print head that prints in both directions for increased efficiency. And it features a three-line buffer that allows printing to continue while the terminal is processing.

**An A+ in Reliability & Compatibility**

The PRINTER 900 has a print head life of 100 million characters, a significant performance breakthrough. The overall mechanism has a reliability measure of 2.5 million lines. These factors ensure that the PRINTER 900 provides years of reliable performance.

**Extra Credit for User-Friendliness**

The PRINTER 900 has a number of features that make it remarkably easy to operate and maintain. For example, integrated paper roll support arms help keep the paper in place without need of a spindle, an item that is frequently misplaced.

Automatic paper feeding ensures trouble-free loading. And a high-yield ribbon, developed exclusively by VeriFone, has a life of 2.0 million characters—to minimize the cost of ownership. Additionally, paper-low/paper-out sensors inform you of the status of your paper supply.

**The highest marks for speed and reliability. VeriFone's top-of-the-line roll printer is in a class by itself.**

As a premium roll printer that can increase merchant productivity, the Printer 900 earns the highest marks. This roll printer is in a class by itself, meeting the highest print performance standards.

It also offers a convenient migration path, allowing merchants to move from the Printer 220 or Printer 250 to the Printer 900 with only minor adjustments to their payment applications.
