

# VERIFONE VX510 TERMINAL

The Vx 510 is a PCI PED and EMV approved entry-point, countertop solution that offers big things in a small package. It provides extraordinary performance in a sleek, compact design.

The PCI PED approved Vx 510 offers superior performance for payment and value-added applications—and dramatically reduces transaction time to just a few seconds. Part of VeriFone's Vx Solutions portfolio, it leverages existing SoftPay and Verix applications to allow merchants to get up and running quickly and efficiently.

## Benefits At a Glance

The latest, most reliable advances in security to give small businesses invaluable peace of mind

Optional GPRS broadband connectivity for lightning-fast transactions

Efficient processing and high-speed thermal printer keep checkout lines on the move

Multi-tasking memory supports bank cards and value-added applications like loyalty or gift cards

ATM-style interface, large backlit display, ergonomic keys and bold prompts reduce errors

The Vx 510's backlit display, easy-to-read menu prompts and intuitive, ATM-style interface reduce the chance of entry errors. In addition, its integrated high-speed thermal printer and internal PIN pad keep countertops clutter-free.

For U.S. and Canadian merchants, the Vx 510 includes Ethernet and 12 MB of memory. In Canada, it is also Interac certified and available with a smart card reader.

For merchants outside the U.S. and Canada, the Vx 510 includes a smart card reader to handle data-intensive EMV transactions plus a choice of dial or dial + Ethernet connectivity, 0 or 3 SAMs, and 3 MB or 6 MB of memory.
