

# PIN PAD 1000 SE

**VeriFone's PINpad 1000S E provides the perfect solution for acquirers, processors, and merchants looking to capitalize on the rapid growth of debit, EBT, and other PIN-based transactions.**

Easily connecting with most existing POS terminals or electronic cash registers, the PINpad 1000SE offers a fast, simple way to be able to accept the latest in PIN-based payment.

The PED-compliant PINpad 1000SE puts merchants on the card industry's leading edge by incorporating a broad array of sophisticated security features to guard against fraud and abuse. This includes full support

## Features

- Meets PED and Triple DES security requirements
- Supports Master/Session DUKPT
- Modern, sleek design
- Large rubber keys improve usability
- Fully backward compatible

The PINpad 1000 Terminal provides maximum flexibility for debit card transactions. Key management is integral to the PIN encryption process. Used worldwide, the Master/Session method uses master keys and working session keys.

The PINpad 1000 offers consumers a number of advantages. So compact it fits in the palm of the hand, it allows customers to enter their PINs in complete confidentiality. And its easy-to-read eight-character display lets them confirm the purchase amount. For efficient deployment and cost savings, you can use VeriFone's MKIXOR software to inject the PINpad 1000 for either Master/Session or DUKPT key management.

If both key types have been injected, you can easily reset the PINpad 1000 on site when you switch from one methodology of key management
